

## Test Cases

### Wander WebPage

**Title:** Verify the user can select a specific location from the location filter and the webpage shows correct data.

**Owner:** Alvaro Sivila

**Expected Time:** 5 Min

**Priority:** High

**ID:** TC-01

**Description:** This test case verifies that a user can select a specific location from the location filter on the homepage and that the correct data is displayed based on the selected location.

**Requirements:**

- Access to a web browser.
- Internet connection.
- Access to the webpage: wander.com

**Steps:**

1. Open the web browser.
2. Navigate to the homepage in wander.com
3. Click on the "Wherever" button.
4. Select "New York" from the location filter.
5. Click the search button.

**Expected Result:** The selected location should be "New York," and only properties from New York are displayed on the results page. All properties in the selected city should be visible.

---

**Title:** Verify the user can select more than one location from the location filter and show correct data.

**Owner:** Alvaro Sivila

**Expected Time:** 5 Min

**Priority:** High

**ID:** TC-02

**Description:** This test case verifies that a user can select multiple locations from the location filter and that the results reflect the selected locations correctly.

**Requirements:**

- Access to a web browser.
- Internet connection.
- Access to the webpage: wander.com

**Steps:**

1. Open the web browser.
2. Navigate to the homepage in wander.com
3. Click on the "Wherever" button.
4. Select "New York" from the location filter.
5. Select "Texas" from the location filter.
6. Click the search button.

**Expected Result:** The selected locations should be "New York" and "Texas" displayed on the location filter, and only properties from both locations are shown on the results page.

---

**Title:** Verify the user can select available dates with exact dates and the results match the selected dates.

**Owner:** Alvaro Sivila

**Expected Time:** 5 Min

**Priority:** High

**ID:** TC-03

**Description:** This test case verifies that a user can select exact available dates from the date filter and that the displayed results correspond to those dates.

**Requirements:**

- Access to a web browser.
- Internet connection.
- Access to the webpage: wander.com

**Steps:**

1. Open the web browser.
2. Navigate to the homepage in wander.com
3. Click on the "Whenever" button.
4. Select the exact dates from the "13th" to the "16th" of the current month.
5. Click the search button.

**Expected Result:** The correct dates should be displayed in the filters, and only properties available on the selected dates should be shown in the results.

**Title:** Verify that the user can define the number of guests and that the results show properties with the appropriate number of guests.

**Owner:** Alvaro Sivila

**Expected Time:** 5 Min

**Priority:** High

**ID:** TC-04

**Description:** This test case verifies that a user can set the number of guests in the guest count filter, and the displayed properties should accommodate the selected guest count.

**Requirements:**

- Access to a web browser.
- Internet connection.
- Access to the webpage: [Homepage URL].

**Steps:**

1. Open the web browser.
2. Navigate to the homepage in wander.com
3. Click on the "Wherever" button.
4. Select "New York" from the location filter.
5. Click on the "Whoever" button.
6. Set the guest count to "6."
7. Click the search button.

**Expected Result:** The selected location should be "New York," the selected guest count should be "6," and only properties that can accommodate at least 6 guests should be displayed.
